“SUPPORTING ACTION FOR CLIMATE CHANGE MITIGATION”

The PMR is a forum for collective innovation and action and a fund to support capacity building to scale up climate change mitigation

- The PMR provides support to prepare and implement climate change mitigation policies –including carbon pricing instruments—in order to scale up GHG mitigation.
- Serving as a platform to share lessons, countries work together to shape the future of cost-effective GHG mitigation.

“Analyzing Suitability of MBIs for Turkey”

**STAKEHOLDER
ENGAGEMENT**

BUILDING**

02

**ANALYTICAL
REPORTS**

03

Roadmap for the Consideration of Establishment and Operation of a Greenhouse Gas Emissions Trading System in Turkey (ETS):

Objective:

To develop analytical report on the suitability of and implementation roadmap for ETS in Turkey.

Activities:

1. Analysis of ETS design feature and options, and assessment of their suitability for Turkey
2. Institutional and legislative gap analysis
3. Policy interaction analysis
4. Private sector ETS guidance
5. ETS Implementation Roadmap
6. Capacity building workshops

Timeline:

November 2015 - November 2016

Assessment of Market Based Emission Reduction Policy Options for Turkey (MBIs):

Objective:

To advice on the suitability of different market based instrument (MBI) options

Activities:

1. Assessment of
 - Carbon tax
 - Energy efficiency trading scheme (EETS)
 - Renewable energy trading system (RETS)
 - Scaled-up crediting mechanism (SCM) and
 - Results based finance (RBF)
2. Analysis on revenue recycling options
3. Policy interaction analysis
4. Capacity building workshops

Timeline:

May 2016 - May 2017

Pilot Monitoring, Reporting and Verification (MRV):

Objective:

To build capacity among pilot installations to road-test the MRV legislation (enforced in 2014). 18 electricity generation, 5 cement and 1 refinery installations volunteered for the pilot.

Timeline:

September 2014 - July 2016

Activities:

1. Development of monitoring plan and emission reports
2. Verification activities
3. Testing of the online data management system
4. Capacity development trainings and workshops for public and private sector
5. Dissemination of lessons-learned

Modelling Fiscal, Economic and Sectoral Impacts of Carbon Pricing in Turkey:

Objective:

To analyze and understand the potential fiscal, economic and sectoral consequences of different carbon pricing mechanisms in Turkey leading in turn to recommendations on the most suitable and cost-effective carbon pricing option(s).

Timeline:

January 2017 - January 2018

Activities:

1. Modelling and analysis of the fiscal, economic and sectoral impacts of adopting particular carbon pricing policies
2. Development / tailoring of models, tools, and gathering of data sets
3. Recommendations on the most suitable and cost-effective carbon pricing option(s)
4. Capacity building (including the development of training materials and user manuals) on the developed models and tools

Synthesis Report on the Suitability and Applicability of MBIs in Turkey:

Objective:

The synthesis report will draw upon the results of the analytical and technical studies and stakeholder feedbacks. It will provide decision-makers with analytical recommendation on the most suitable and feasible MBI(s) to implement in Turkey.

Timeline:

January 2018 - June 2018
